As I have experienced in various work settings, pursuing hundreds of unique credentials and specializations, working with unique patient populations, and challenging in an environment that is constantly evolving. I can perform various duties including preventative and primary care, educating patients about disease prevention, operating medical equipment, and administering medications.

EXPERIENCE

OCT 2018 – OCT 2020

ER NURSE, HMH HEALTH MISSION HOSPITAL

I was responsible for providing care for patients with various forms of illness, trauma, and life-threatening conditions that require immediate, emergency attention.

- Triage incoming patients based on level of injury or illness
- Immediately stabilize incoming patients
- Administer medication as instructed by physicians
- Start intravenous lines, and set broken bones
- Perform tracheotomies and intubations
- Give patients stitches and sutures
- Create and maintain incoming patient records
- Work with team of emergency staff to help patients
- Help transfer stable patients to other wings
- Counsel patients and family members on disease prevention and health maintenance
- Order and evaluate diagnostic tests to assess patients' conditions and needs
- Supervise the work of licensed practical nurses, nursing aides, and assistants
- Educate patients about their medical conditions and treatment plans
- Maintain a safe, hygienic working environment
- Prepare rooms and medical equipment and decontaminate instruments
- Provide emotional and psychological support

SEP 2016 – SEP 2018

PEDIATRIC NURSE, BABY AND MOM CENTER

I was responsible for communicating with children of different abilities and developmental levels about their symptoms, talking to patients and their families about medical issues and recording the child's vital signs and lab results

- Check in child patients, evaluating their symptoms and checking their vital signs
- explain each step of the procedures they perform and communicate with children about their care, even if they are not speaking yet.
- Complete diagnostic tests
- Administer medications or minor procedures
- Create a treatment plan or coordinate follow-up medical care
- Educate family members on treatment options

SKILLS AND QUALIFICATIONS

- Proficiency in English
- Expert knowledge of emergency medicine
- Advanced Cardiac Life Support (ACLS)
- Exceptional multitasking and time-management skills
- Excellent interpersonal skills
- Specialized training in working with younger children
- Ability to work on feet for long hours
- Proficiency in office and medical software
- Ability to work calmly in high-pressure situations
- Empathy and patience
- Highly developed problem-solving skills

EDUCATION
